Claims

- [c1] What is claimed is:
 - 1.A wireless communication system comprising: a housing;
 - an antenna installed inside the housing comprising: a radiator for transmitting and receiving radio signals; and
 - a ground terminal connected to the radiator for grounding; and
 - a dielectric material installed inside the housing and not installed between the radiator and the ground terminal.
- [c2] 2.The wireless communication system of claim 1 wherein the dielectric material is glued to the inner side of the housing.
- [c3] 3.The wireless communication system of claim 1 wherein the dielectric material is locked to the inner side of the housing.
- [c4] 4.The wireless communication system of claim 1 wherein the dielectric material is embedded in the inner side of the housing.

- [05] 5.The wireless communication system of claim 1 wherein the dielectric material is connected to the inner side of the housing in a one-unified-body structure.
- [c6] 6.The wireless communication system of claim 1 wherein the housing is a LCD cover.
- [c7] 7.The wireless communication system of claim 1 wherein the dielectric material is made of plastic.
- [08] 8.The wireless communication system of claim 1 wherein the dielectric material is made of cermet.
- [09] 9.The wireless communication system of claim 1 wherein the dielectric material is a glass fiber substrate.
